

*The Chief of Tehran agricultural Jihad Announced: Revival of destroyed lands

The second press meeting of Tehran agricultural Jihad chief was held at July 10, 2006. Seyed Mohsen Hosseini (B.S) gave a full report of agricultural Jihad performances during the current agricultural year. He had once postponed this report to the next months from the previous year. He also mentioned that agricultural Jihad and Tehran municipality would cooperate to prevent wastewater closure to agricultural waters. He declared: "This year's change of lands usage wasn't

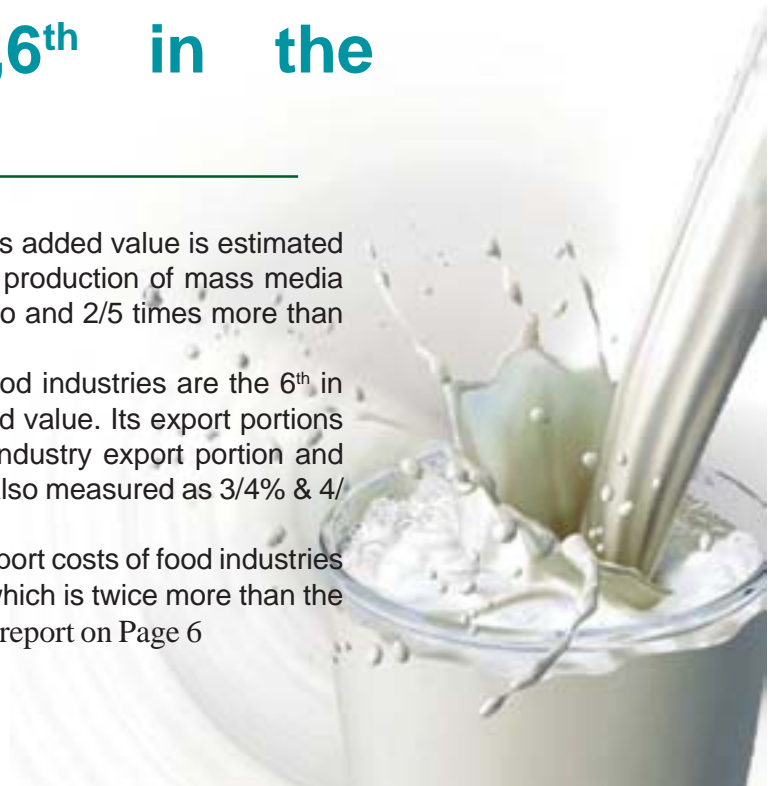

noticeable and the record of 180 hectares wasn't satisfyable. But it was much better than previous year. It seems that cash fine isn't useful and we should think about some other solution." Tehran agricultural Jihad chief, pointed to parliament efforts to pass a law to prevent lands usage changes, said: "The cooperation of municipality in Tehran prevents activities of this kind and will neutralize them if happened." Food industries, 6th in the country

Food and drinking industries added value is estimated as 11 times more than the production of mass media sets like television and radio and 2/5 times more than the cloths industries'.

The analysis shows that food industries are the 6th in the country regarding added value. Its export portions from the whole mine and industry export portion and from the non-oil exports is also measured as 3/4% & 4/66% in order.

It's noticeable that mean export costs of food industries is 630 dollars in every ton which is twice more than the industrial goods'. Read Full report on Page 6

* Allocating all possibilities of Agricultural Bank to Distribution Aims

Only 35% of farmers have saving accounts in agricultural Bank. Mohammad Ghaemian (B.S), the manager of credits and financing affairs in this bank reminded that the bank has had some non-related activities during the past years and it seems to be the most important challenge, which limited its cooperation with farmers.

He Declared: “Nowadays it has been so difficult to equip financial sources in order to support farmers, which is because of the balancing of benefits. So this bank should encourage more saving accounts to decrease the pressures it faces.” Read Full report on Page 24.

* Up going process of caviar production starts this years

The chief of Fishery Organization: “I will be a national hero.”

Previously Dynamic Economic, one of the most challenging newspapers in the filed of economics by some critiques claims, asked Dr. Nezami some outrageous questions about his concerns and what he’s going to perform in this organization. It could be so interesting for many to know that the chief of fishery organization is fond of caviar but haven’t had for 12 years. He also loves sea and believes that Iran possess the capacity of many million tons production of aquatic creatures, which will happen through learning the actual knowledge of it and strengthening the unit of sea protection. He believes that the capacity of aquatic creatures production at south is much more than north if the situations of which be managed. He openly declared that has decided to remain in this organization for 8 years as the same he was in Environment organization if the process of caviar production changes to upgoing and he can be a national hero.
