

Crocodile Nurturing Association Helps to Applicants

Crocodile Nurturing Association is to establish in order to plan and follow educational affairs as well as providing necessary technologies in this industry.

Dr. Shabanali Nezami, the President of the Fishery Organization, acknowledged this point and mentioned that there are 2 agreements assigned for nurturing crocodile in the country.

He pointed to the lack of professional experts in this organization as the main reason of surrendering it to the private section and relying in its potentials for providing a logical and coherent policy applicable for all actors in this field.

While, each of early trustees of this industry which are also numerous because of multi-trustee nature of it, know itself as rightful, authorized by different organizations.

With the Cooperation of ODA and JICA Happens:

Japan's 10 Billion Dollars Annual Grants to Developing Countries

Japan, preserving its interests, established "Japan International Cooperation Agency" (JICA) at 1974 in Iran and 94 other countries in order to establish peace and development in the global society. Daam Kesht and Sanat Monthly arranged an interview with Mr. Sakno Ashino, resident representative of JICA in Iran, during which he explained that Iran office of JICA has many activities regarding water, soil and agriculture and Iran share of budget from ODA and JICA is about 11 million dollars.

Regarding JICA participation to improve agricultural activities, he asserted that its experts have started to restore the irrigation position of Bam just like before the earthquake and study the emergency restoration of Kerman aqueducts from November 2006. Also, environmental project of Anzali lagoon has started from 2007 and lasts about 2 years. The analysis of comprehensive management of water resources at the Sefidrood zone has inaugurated in 7 provinces.

Dutch (Oil) Disease, Now Widespread in Agricultural Section

The symptom of Dutch Disease in Iran is recognizable in sudden increase of exchange rate provided from the oil global cost increase, which is unfortunately accompanied by weak planning and performing of infrastructural performances, affecting the agricultural section too. So today, we have faced with irregular increase of importing all sorts of agricultural products and transforming food and drinks products, without any supervision on these multinational low qualified products. It is expected that the government plan logically and basically for exploiting oil incomes so we can not only meet our internal needs but also become one of the main centers of production and export in the world.

National economy can't achieve to permanent growth and development, without providing comprehensive and healthy ties with global economy; the agricultural section and its main subdivision, transforming industries, are not excluded from this principles.

Days of Frostbitten Gardeners, More Bitter than Frozen Oranges

This year's unexpected cold weather imposed heavy damages to the gardeners and orange gardens and alongside decreases this product, endangered the livelihood of gardeners.

It's obvious that in current year there would be a decline in the rate of orange export and noticeable increase in its import rates. Illegal distribution of frozen and bitter oranges by dealers and middlemen in internal markets cause its illogical high cost and the in-

crease of demands of costumers for abroad orange.

While, agricultural managers and farmers complain against the high total

cost of every hectare, severity of damages and the low insurance assigned to compensate the damages. They believe that the insurance compensation is just like a paregoric compensating the pain not caring the illness.

They insisted that traditional structure of the gardens and neglecting the necessity of mechanization of agricultural affairs are the main causes of damage and asked for actual support of government and promoting the culture of renovation and qualitative improvement of this section by its educated experts.
